Criterion B: Record of tasks

Task number	Planned action	Planned outcome	Time estimated	Target completion date	Criterion
1.	Redact my choice of topic	Google Document with the choice of topic	1h	11/02/2022	A
2.	Interview with the client	Get the client's expectancies of the project, as well as to know her preferences	1h	18/02/2022	A
3.	Redact my criterion A document	Google Document with a description of the scenario, determining the client and advisor, with the interview, the criteria for success and the rationale for the solution.	1h	18/02/2022	A
4.	Redact my tasks record	Google Document with a table with all my tasks to record	2h	21/09/2022	B
5.	Find the languages that I will need to learn	Put them to learn them in the Criterion B document and find courses	2h	21/09/2022	A and B
6.	Planify my languages' aprenentatge	Put the tasks' timing in the criterion B document	2h	21/09/2022	B
7.	Code the bootstrap and HTML general structure	Get first the general structure of the web site with its pages and buttons, so that after I do only	10h	3/10/2022	C

		have to work with the database			
8.	Learn PHP	Watch the freecodeCamp tutorial	7h	10/10/2022	C
9.	Search MySQL tutorial	Find a youtube video or page	30min	10/10/2022	C
10.	Learn MySQL and Bootstrap CRUD	Learn what I need to know about databases and how to connect them to php and html Bootstrap to implement a CRUD	5h	28/10/2022	C
11.	Code the display of ingredients approaching consumption date	Now that I have learnt everything, I will implement the databases and connect them to my web application, starting by displaying the ingredients that approach the date	2h	29/10/2022	C
12.	Fix issues with the date format	Search how to get my actual date and make it compatible with MySQL	1h	30/10/2022	C
13.	Put a couple of items in the databases	Build a small version of the database to experiment and test the implemented page.	30min	30/10/2022	C
14.	Code the ingredients update page	Code the form page to update information and	1h	30/10/2022	C

		the backend page where do the MySQL queries			
15.	Code the ingredients deletion page	Code the backend page to delete ingredients, passing their id through post	1h	30/10/2022	C
16.	Code the ingredients addition page	Code the form to add the ingredients and the php backend page	2h	30/10/2022	C
17.	Test the coded parts	Through the interface of the urgents ingredients shown and the ingredients addition page, test the addition, deletion and update functions	30min	30/10/2022	C
18.	Code the recipes addition	Reuse the ingredients addition part conveniently	30min	1/11/2022	C
19.	Code the ingredients search part I	Code the search of ingredients selon their ingredient type. Take into account the flags	1h	1/11/2022	C
20.	Code the ingredients search part II	Code the ingredients search selon place using checkboxes forms	1h	2/11/2022	C
21.	Fix bug with the checkboxes form	Problem creating the MySQL sentence. Ask my companions in CS	1h	3/11/2022	C

		class			
22.	Pages diagrams	Do the pages diagrams to put in the criterion B	1h	4/11/2022	B
23.	Database diagram	Do the UML diagram of the relationship between the tables in my database	30min	4/11/2022	B
24.	Testing plan	Concrete my testing plan to test each of the success criteria	1h	4/11/2022	B
25.	Search selon recipe	Code the search selon recipe	1h	4/11/2022	C
26.	Recipe ingredient update	The client should be able to make updates in the ingredients that	1h	8/11/2022	C
27.	Reformulate ingredientsrecipes tables	I have just found out the necessity of an IdRel identifier. Implant it and fix the code.	2h	8/11/2022	C
28.	Bug with Xampp panel. Unexpected MySQL shutdown	Fix it to be able to run MySQL for 2min and display my web site.	3h	11/11/2022	C
29.	Had to uninstall Xampp and all the files	Rebuild the crud database	30min	11/11/2022	C
30.	Test the application	Give the application to my peers to try a beta testing	30min	16/11/2022	C
30.	Fix a bug about addition of	You should not be able to add an	30min	17/11/2022	C

		existing recipes	ingredient type or recipe that does already exist			
31.		Fix the bug about the wrong answers: If I put YES in the critical option, I get a wrong option message, but then it appears as one of the answer options to field the form with, even if there still is the error message.	Any options that are not prescribed in my code will not be shown in the form by shutting off the autocomplete	15min	17/11/2022	C
32.		Meeting with my supervisor	Comment on the solution development process	45min	23/11/2022	E
33.		Implement the message about the recipes that can be done	Output a message if a recipe can be done: all the critical ingredients are in the recipe	1h30	2/11/2022	C
34.		Search about making buttons of a table	Be able to click on an ingredient or recipe table row and be redirected to the search by recipes or by ingredients name	3h	2/11/2022	C
35.		Implement sql command for urgent section	Use a select where instead of selecting all and then doing an if	1h	30/11/2022	C
36.		Meeting with my client	Show her the solution and see if it suits her needs	1h	12/12/2022	E

37.
